

SIMULSCRIBE AWARDED BEST SPEECH-ENABLED UNIFIED COMMUNICATION SOLUTION BY AVIOS

The Applied Voice Input/Output Society (AVIOS) awarded SimulScribe's highly advanced voicemail-to-text system Best-of-Show at SpeechTEK 2007.

(NEW YORK, NY) March 27, 2007 – SimulScribe, the largest U.S. provider of voicemail-to-text services, announced today it was awarded Best Speech-enabled Unified Communication Solution by the Applied Voice Input/Output Society (AVIOS), the Speech industry's professional society. According to AVIOS SimulScribe was chosen for its "eponymous telephony application to transform audio voicemail messages into email and web accessible text." The AVIOS awards are the highest honor an individual or organization can receive in the speech technology industry.

"This award is a great accomplishment for the SimulScribe team because it affirms the years of work we have poured into creating an extremely advanced and scalable backend processing system," said James Siminoff, founder and CEO of SimulScribe. "As the leading voicemail-to-text provider in the U.S., we are constantly looking to make our customers lives easier and more productive by enabling them to read their voicemail in better more efficient ways. We are very proud to receive this honor from AVIOS as it reaffirms our leadership position in this market."

SpeechTEK is recognized worldwide as the leading source of news, information and analysis relating to the speech technology industry. Comprised of leaders in the voice and speech technology industry, SpeechTEK focuses on how new speech technologies are changing the way businesses operate and how organizations can integrate new products and services to improve operations. AVIOS, founded in 1981, is a professional society dedicated to promoting the development and diffusion of real world applications of speech technology.

About SimulScribe

SimulScribe converts voicemail to text and delivers it via email or SMS. Voicemail transcribed through SimulScribe's patented technology is delivered in near real-time with the caller's phone number in the subject line, transcribed voice message in the email body and an attached .wav file of the original audio. SimulScribe provides unlimited voicemail box storage and the voice recognition system has a transcription accuracy of over 90 percent. The service works with all wireless and wire-line network providers and new users can sign up at www.SimulScribe.com
