

STUDY FINDS SIMULSCRIBE'S VOICEMAIL-TO-TEXT SAVES LAWYERS THREE HOURS PER MONTH

SimulScribe's visual voicemail system saves law firms time and money.

(NEW YORK, NY) June 20, 2007 - SimulScribe, the global leader in voicemail-to-text services, announced today the findings of a customer survey that indicate lawyers and heavy voicemail users save an average of three hours per month reading voicemail instead of listening to voicemail.

"Many extraneous factors affect my ability to get and respond to voicemail efficiently, which is why dealing with it is so frustrating," said Daniel Kratka, attorney with Wilens and Baker, P.C. "Being able to read my voicemail saves me time, money and improves communication with my clients. SimulScribe is an indispensable part of my mobile life."

SimulScribe utilizes a highly proprietary voice recognition system to transcribe voicemail messages into text and deliver them via e-mail. Voicemail transcribed through SimulScribe arrives as an e-mail in near real-time with the caller's phone number in the e-mail subject line, transcribed voice message in the body and an audio file of the original message as an attachment. Customers can manage and respond to voicemail message via their e-mail inbox or using the Company's online user interface.

"The average lawyer works 60 plus hours per week, while still trying to manage a personal life," said James Siminoff, founder and CEO of SimulScribe. "We save law firms and other high volume voicemail users thousands of dollars by eliminating time wasted listening to voicemail."

SimulScribe is the first company to offer a unified messaging system that enables users to read and listen to voicemail in near real-time. Simulscribe voicemail transcriptions can be delivered to multiple e-mail addresses and vice versa, optimizing communication for legal teams. Law firms and end users can sign up for the service in a matter of minutes at www.SimulScribe.com.

About SimulScribe

SimulScribe converts voicemail to text and delivers it via email or SMS. Voicemail transcribed through SimulScribe's patented technology is delivered in near real-time with the caller's phone number in the e-mail's subject line, transcribed voice message in the body and an attached audio file of the original message. SimulScribe provides unlimited voicemail box storage and the voice recognition system has a transcription accuracy of over 90 percent. The service works with all wireless and wire-line network providers.
